

SAHANA NAIK

Data Analyst | Tableau | Power BI | SQL | Python | Excel VBA

Bengaluru, Karnataka, India • +91 72049 64945 • sahana_naik1704@gmail.com

LinkedIn: [linkedin.com/in/sahana-naik-ml](https://www.linkedin.com/in/sahana-naik-ml) • GitHub: github.com/sahana769

PROFESSIONAL SUMMARY

Data Analyst and Python Developer with experience in SQL, Python, Pandas, NumPy, Tableau, Power BI, and advanced Excel for data processing, dashboard development, KPI reporting, exploratory analysis, data validation, and workflow automation. Analyzed more than 150,000 electric-vehicle records to develop interactive Tableau dashboards covering adoption trends, manufacturer market share, regional patterns, vehicle performance, and business KPIs. Experienced in cleansing, transforming, reconciling, and validating customer and transaction data to support accurate and auditable reporting. Skilled at translating business requirements into analytical solutions, identifying operational improvement opportunities, and communicating insights through dashboards and reports. Strong foundation in statistics, machine learning, predictive analytics, and AI, supported by an MCA in Computer Applications.

TECHNICAL SKILLS

Analytics: Python, SQL, Pandas, NumPy, R, Data Cleaning, Data Transformation, EDA, Statistical Analysis, Data Validation, Data Reconciliation, Data Quality Checks, Quantitative Analysis

BI & Reporting: Tableau, Power BI, Advanced Excel, Excel VBA, Macros, KPI Dashboards, Business Reporting, Operational Reporting, Data Visualization, Data Modeling, Revenue Analytics

Machine Learning: Regression, Classification, Time-Series Forecasting, Feature Engineering, Random Forest, XGBoost, Predictive Analytics, Model Evaluation, Cross-Validation

Automation & AI: Python Automation, Workflow Automation, Generative AI, LLMs, RAG, Semantic Search, Prompt Engineering, Evaluation Frameworks, Guardrails

Tools & Professional: Git, GitHub, REST APIs, FastAPI, Flask, SQLAlchemy, SQLite, Agile, Requirements Gathering, Stakeholder Communication, Data Storytelling, Documentation, Governance, Auditability

PROFESSIONAL EXPERIENCE

Python Developer — Shree Saikrishna Enterprises Hubballi, Karnataka | Mar 2026 – Present

- Develop Python-based solutions for business and operational requirements using Python, SQL, Pandas, and NumPy.
- Process, transform, and analyze structured data to support operational reporting, workflow improvement, and business decisions.
- Build Python scripts to automate repetitive data-processing and operational tasks, reducing manual effort and improving process consistency.
- Perform data validation and error checks to improve the quality and reliability of analytical outputs.
- Debug, test, and optimize Python code to improve application reliability, performance, and maintainability.
- Translate business requirements into practical technical solutions and collaborate with team members to deliver accurate outputs.

Data Analyst Intern — Seventh Sense Talent Solutions Bengaluru, India | Nov 2024 – Feb 2025

- Collected, cleaned, transformed, and validated customer and transaction datasets using SQL, Python, and advanced Excel for accurate and auditable reporting.
- Performed exploratory data analysis and statistical profiling to identify customer behavior trends, churn patterns, revenue drivers, and operational opportunities.
- Developed interactive Tableau dashboards and Power BI reports to track KPIs, revenue trends, operational metrics, and business performance.
- Implemented data-quality checks, source reconciliation, discrepancy identification, and issue follow-up using SQL, Python, and Excel.
- Designed Excel workbooks and VBA/macros to automate recurring data extraction, transformation, validation, and reporting workflows.
- Built Python-based workflows with evaluation checks and guardrails to reduce manual effort and improve analytical consistency.
- Translated business requirements into analytical problems and collaborated with Product, Engineering, and Finance teams in an Agile environment.
- Documented datasets, assumptions, business rules, analytical methods, and validation procedures to support governance and auditability.

KEY PROJECTS

Electric Vehicle Data Analysis Dashboard
Tools & Methods: Tableau, Excel, Data Visualization, Dashboard Reporting, KPI Tracking

Interactive Analytics & KPI System

- Developed an interactive Tableau dashboard analyzing more than 150,000 electric-vehicle records across states, manufacturers, vehicle categories, and model years.
- Created KPI views to monitor total vehicles, average electric range, BEV/PHEV distribution, CAFV eligibility, and year-over-year adoption trends.
- Designed interactive filters, geographic maps, trend charts, and performance reports for data exploration and business reporting.
- Analyzed manufacturer market share, vehicle-model performance, and regional adoption patterns to generate actionable insights.

Corporate Revenue Forecasting Using Machine Learning
Role: Data Scientist / ML Developer | **Tools:** Python, SQL, Pandas, Scikit-learn, Regression, Random Forest, XGBoost

Time-Series & Predictive Analytics

- Developed predictive models using Linear Regression, Random Forest, and XGBoost to forecast corporate revenue trends.
- Performed feature engineering, EDA, statistical analysis, and PCA to identify revenue drivers and improve model interpretability.
- Evaluated models using standard metrics and cross-validation to select robust forecasting approaches.
- Automated forecasting and reporting workflows using Python scripts to support repeatable business analysis.

IntelliLab AI – Clinical Laboratory Intelligence Platform
Role: AI Engineer / Backend Developer | **Tools:** Python, FastAPI, Streamlit, LangChain, Gemini, EasyOCR, SQLAlchemy

Production AI & Backend Engineering

- Built an AI-enabled laboratory-report interpretation platform using OCR, retrieval-augmented generation, and structured data processing.
- Developed modular REST APIs using FastAPI and SQLAlchemy to integrate backend services with application interfaces.
- Implemented health checks, error handling, retries, and fallback mechanisms to improve application reliability.
- Applied retrieval and evaluation techniques to support traceable, consistent, and auditable AI-assisted outputs.

EDUCATION

Master of Computer Applications (MCA)
AMC Engineering College, Bengaluru

CGPA: 9.2 / 10

Bachelor of Computer Applications (BCA)
Govt. First Grade College, Honavar

CGPA: 8.11 / 10

CERTIFICATIONS

- Data Science with Generative AI Program – Great Learning
- Azure Fundamentals – Simplilearn SkillUp
- Gemini for Google Workspace – Simplilearn SkillUp
